1. NID Verification

Field	Details
Test Case ID	TC-MSH-NID-01
Test Scenario	Verify that the system successfully verifies a user when valid NID information is submitted.
Preconditions	1. User account is active and logged in. 2. User has not completed NID verification. 3. User has a valid NID document.
Test Steps	1. Navigate to the NID Verification page. 2. Enter valid NID information. 3. Upload a valid NID document. 4. Click the Verify NID button.
Input Data	NID Number: 1234567890 Name: Rahim Ahmed Date of Birth: 01/01/2000 NID Document: Valid
Expected Result	System accepts the NID information and displays a successful verification message. The user's verification status changes to Verified.
Actual Result	System successfully accepted the valid NID information and updated the user's status to Verified.
Status	Pass
Remarks	Valid NID information is used to verify the user's identity.

2. Service Posting

Field	Details
Test Case ID	TC-MSH-SP-01
Test Scenario	Verify that the system successfully posts a micro-service when all required service information is valid.
Preconditions	1. User account is active and logged in. 2. User is a verified Service Seeker. 3. User can post a new service.
Test Steps	1. Navigate to the Post Service page. 2. Enter the service title. 3. Enter the service description. 4. Enter the service budget. 5. Enter the service location. 6. Enter the deadline. 7. Click the Post Service button.
Input Data	Service Title: Key Delivery Description: Deliver a key from Dhanmondi to Mirpur-10 Budget: 500 tk Location: Dhanmondi Deadline: 2 Hours
Expected Result	System successfully creates the service and displays it in the available service list. The service status becomes OPEN.
Actual Result	System successfully created the Key Delivery service with 500 tk budget and status OPEN.
Status	Pass
Remarks	Valid service information and a valid budget within 100–1,000 tk are used.

3. Service Search & Discovery

Field	Details
Test Case ID	TC-MSH-SSD-01
Test Scenario	Verify that the system displays relevant available services when a Service Provider searches using a valid keyword and location.
Preconditions	1. Service Provider account is active and logged in. 2. At least one relevant service is available. 3. The service status is OPEN.
Test Steps	1. Navigate to the Service Search & Discovery page. 2. Enter a service keyword. 3. Enter or select a location. 4. Click the Search button. 5. View the search results.
Input Data	Search Keyword: Key Delivery Location: Mirpur Service Status: OPEN
Expected Result	System displays available services matching the Key Delivery keyword and Mirpur location. Service title, budget, location, and description are displayed.
Actual Result	System successfully displayed matching Key Delivery services in Mirpur with relevant service details.
Status	Pass
Remarks	Valid search criteria are used to verify service discovery and location-based results.
