1.Location-Based Service Matching

Field	Details
Test Case ID	TC-MSH-EP-01
Test Scenario	Verify that the system accepts a valid nearby location and displays matching services.
Preconditions	1. User account is active and logged in. 2. Location permission is enabled. 3. Nearby services are available in the selected area.
Test Steps	1. Navigate to the Nearby Services page. 2. Select a valid nearby location. 3. Click the Search Services button.
Input Data	- Location: Dhanmondi, Dhaka - Location Type: Valid nearby location
Expected Result	System accepts the valid location and displays available services matching the selected nearby location.
Actual Result	System accepted the valid nearby location and displayed matching services.
Status	Pass
Remarks	Validates the valid location partition using the Equivalence Partitioning (EP) technique.

2.Service Application

Field	Details
Test Case ID	TC-MSH-EP-02
Test Scenario	Verify that a verified Service Provider can successfully apply for an available service.
Preconditions	1. Provider account is active and logged in. 2. Provider's NID verification is completed. 3. The selected service is available for application.
Test Steps	1. Navigate to the Available Services page. 2. Select an available service. 3. Click the Apply button. 4. Submit the application.
Input Data	- Provider Status: Verified - Service Status: Available - Application: Valid
Expected Result	System accepts the application and shows a confirmation message such as "Application submitted successfully."
Actual Result	System accepted the application and displayed the confirmation message.
Status	Pass
Remarks	Validates the valid application partition using the Equivalence Partitioning (EP) technique.

3.Provider Selection & Acceptance

Field	Details
Test Case ID	TC-MSH-EP-03
Test Scenario	Verify that the Service Seeker can select a valid Service Provider and accept the application.
Preconditions	1. Service Seeker is logged in. 2. Service has received valid applications. 3. Service Provider applications are available.
Test Steps	1. Open My Services. 2. Select a service with applications. 3. View applicant list. 4. Select a valid Service Provider. 5. Click Accept Provider.
Input Data	Provider Status: Valid/Verified Application Status: Valid/Pending
Expected Result	System accepts the selected provider and assigns the provider to the service successfully.
Actual Result	System accepted the selected provider and assigned the provider to the service successfully.
Status	Pass
Remarks	Validates the valid provider-selection partition using EP.
